MEASURING FOR POLE  
& COLUMN PADS

**#TrainWithConfidence**

# MEASURING FOR POLE PADS (ROUND)

- 1 Wrap the tape measure around the entire pole to determine the circumference
- 2 Divide the circumference of your pole by 3.14 to find the **diameter** of your pole
- 3 Measure floor to ceiling to determine the **height** of the pole

# MEASURING FOR COLUMN PADS (RECTANGLE)

- ① Measure each side of the column, noting the measurements for each of the four sides
- ② Measure floor to ceiling to determine the **height** of the column

# A NOTE ON NON-STANDARD POLES & COLUMNS

**FOR POLES/COLUMNS THAT ARE TRIANGULAR (3-SIDED) OR HAVE MORE THAN 4 SIDES**

- ① Measure each side of the column, noting the measurements for each side
- ② Measure floor to ceiling to determine the height of the column
